Note: Application functionality and availability may vary depending on where you purchase and use iPad.

Viewing in Portrait or Landscape

You can view iPad's built-in applications in any orientation—portrait or landscape. Rotate iPad and the screen rotates too, adjusting automatically to fit the new orientation. Use the screen rotation lock to keep the screen from rotating to a different orientation. See “Screen Rotation Lock and Volume Buttons” on page 9.

You may prefer landscape orientation for viewing webpages in Safari, for example, or when entering text. Webpages automatically scale to the wider screen, making the text and images larger. The onscreen keyboard also becomes larger, which may help increase your typing speed and accuracy.
